Projects

Ai Website Generator

Website | Github

Tech: Next.js, Express.js, Tailwind CSS, TypeScript

- Developed a full-stack, AI-powered web generator using Next.js 15, TypeScript, and Tailwind CSS, allowing users to dynamically spin up responsive frontend components via natural language

Career-nest

Website | Github

Tech: React, Node.js, Express.js, MongoDB, Google OAuth, JWT

- Career-Nest is a full-stack career management platform that implements complete CRUD operations through secure RESTful APIs. The application supports Google Authentication (OAuth 2.0) and JWT-based authorization, allowing users to securely create, read, update, and delete career profiles and portfolio data.

Smart Resume Screeing

Website | Github

Tech: React.js, Mongoddb, Tailwind CSS, JavaScript, Firebase OAuth, Cohere AI

- Resume screening platform using Firebase OAuth authentication and Cohere AI to generate resume match percentage and feedback based on job descriptions.
